Talaat Ramadan

.NET Backend Developer

Cairo, Egypt talatramadan10@gmail.com +20 11 26342642 ixtalaat ixtalaat

Summary

Backend Developer specializing in .NET and ASP.NET Core, with hands-on experience building RESTful APIs and working with Entity Framework Core and SQL databases. Familiar with Clean Architecture, authentication and authorization, dependency injection, and backend best practices. Passionate about writing clean, maintainable code and continuously improving problem-solving and system design skills.

Education

Mansoura University *Sep 2019 – Jul 2023*

B.Sc. in Computer and Information Sciences

- Overall Grade: **80%**
- Graduation Project Grade: **A+**

Experience

Backend Developer *Remote*

Mapour *May 2026 – Now*

- Developed backend services and RESTful APIs for real-estate platforms, supporting property listings, user workflows, and business operations.
- Implemented and maintained backend business logic using clean architecture, SOLID principles, and modular design.

Backend .NET Intern *Remote*

Code Plus *Aug 2026 – Sep 2026*

- Developed scalable ASP.NET Core Web APIs using Clean Architecture, CQRS, and MediatR, with caching, Docker and GitHub Actions CI/CD.

IT Reserve Officer *Egypt*

Egyptian Armed Forces *Apr 2024 – Apr 2026*

- Developed and maintained an internal web-based system using PHP and MySQL for personnel and administrative data management, while troubleshooting issues, supporting users and improving administrative workflows.

Web Development Using .NET – Summer Training *Mansoura, Egypt*

Information Technology Institute (ITI) *Jul 2022 – Sep 2022*

- Completed a 120-hour hands-on training in ASP.NET Core MVC, Entity Framework Core, SQL Server, C#, LINQ, ADO.NET and RESTful API development.

Projects

OrderFlow – Order Management System | *Source Code* Full-Stack Project

C#, ASP.NET Core, Entity Framework Core, SQL Server, Angular, TypeScript, Docker

- Built a full-stack order management platform with an Angular 20 storefront (catalog, cart, checkout, order tracking) and admin backoffice (dashboard, products, inventory, customers, pricing, coupons, orders) backed by a Clean Architecture + CQRS API.
- Implemented JWT authentication with refresh-token rotation and route guards, optimistic-concurrency inventory reservation, transactional outbox with Hangfire for email and accounting sync, and 180+ automated tests with Dockerized deployment.

Tamayoz – Academy Management System | *Source Code* | *Live Site* Freelance Project

C#, ASP.NET Core MVC, Entity Framework Core, SQL Server, ASP.NET Identity, Docker

- Built a full-stack academy management platform with service catalog, booking, portfolio, testimonials,

contact messaging, and administration workflows.

- Implemented role-based administration, database modeling and seeding, security headers, response compression, health checks, and Docker deployment.

HomeTech – Home Maintenance Platform | *Source Code* | *Live Site* Freelance Project

PHP, Laravel, MySQL, Blade, Tailwind CSS, Pest, Firebase Cloud Messaging

- Built a complete service lifecycle platform covering customer requests, technician assignment, scheduling, work orders, invoicing, payments, and reviews.
- Implemented role-based access for customers, administrators, technicians, and branch managers with complex business rules.
- Maintained 260+ feature and unit tests covering core business workflows, queued jobs, scheduled monitoring, and notifications.

Bidaya – Kids Education Management System | *Source Code* | *Live Site* Freelance Project

PHP, Laravel, MySQL, Blade, Tailwind CSS, PHPUnit, WhatsApp Cloud API

- Built a complete student lifecycle platform covering enrollment with capacity and collection billing, scheduling with conflict protection, attendance, assessments, homework grading, per-invoice payments and refunds, certificates, dashboards, and reports.
- Implemented role-based access for super admins, managers, teachers, accountants, parents, and students, with a fully bilingual English/Arabic RTL interface plus in-app and WhatsApp notifications.
- Maintained 190+ feature and unit tests covering core business workflows, state transitions, authorization boundaries, and financial rules.

PickPark – Parking Management System | *Source Code* Graduation Project

Node.js, Express.js, GraphQL, PostgreSQL, Redis

- Developed RESTful and GraphQL backend services for parking reservations, booking management, and availability tracking.
- Designed PostgreSQL schemas and relationships for booking workflows and implemented Redis caching to reduce repeated database queries and improve API performance.
- Structured backend business logic into modular components following clean coding and maintainability principles.

Technical Skills

- **Languages:** C#, TypeScript, JavaScript, PHP
- **Backend:** ASP.NET Core, Web API, MVC, RESTful APIs, ASP.NET Core Identity, CQRS, MediatR
- **Data:** SQL Server, Entity Framework Core, LINQ, PostgreSQL, MongoDB, Redis, Database Design
- **Architecture & Practices:** Clean Architecture, Layered Architecture, SOLID, OOP, Design Patterns, Clean Code
- **Testing:** Unit Testing, Integration Testing
- **DevOps & Tools:** Git, GitHub Actions, Docker, CI/CD, Postman, Swagger
- **Frontend:** Angular, HTML, CSS, Bootstrap

Courses & Certifications

Building REST APIs with .NET *May 2026*
DevCreed

Object-Oriented Design *Sep 2023*
University of Alberta – Coursera

Languages

Arabic: Native **English:** Intermediate
